SPEAKER ONE-SHEET

Corey White

Keynote Speaker · Author · Founder & CEO, Cythentic

> ***Connects quantum thinking, AI and cybersecurity to real business risk.***

30+	50+	200+	2024
YEARS IN CYBERSECURITY	MEDIA APPEARANCES	ORGANIZATIONS PROTECTED AT CYVATAR	SANS TOP SUMMIT TALK

ABOUT

Who Corey is

Corey White is the founder and CEO of Cythentic, a cybersecurity company built for consumers and small businesses. He created Remi by Cythentic, an AI security coach that helps families close the gaps attackers use. In more than 30 years in cybersecurity, he has protected Fortune 500 institutions, governments and critical infrastructure.

He founded, scaled and sold Cyvatar (2026), a managed security company with zero reported major customer breaches across seven years, protecting 200+ organizations. Earlier, he served as SVP of Worldwide Consulting and Chief Experience Officer at Cylance, a pioneer of AI-driven endpoint protection, and came up through Foundstone with the generation that built the security industry, the same alumni network that went on to found CrowdStrike, Mandiant and Cylance. He is a contributor to Ross Haleliuk's Cyber for Builders.

Speaking as Quantum Corey, he connects quantum thinking, AI and cybersecurity to real business risk. His talk on AI-based threats was named a Top Summit Talk of 2024 at the SANS AI Cybersecurity Summit. He is the author of You're Already a Target, on Kindle pre-order ahead of its November 3, 2026 release.

STAGES

Where Corey speaks

SANS AI Cybersecurity Summit
Top Summit Talk of 2024, on AI-based threats

RSA Conference
Speaker, 2021

SXSW
Speaker, with a live CBS News Austin segment

Mastercard Small Business Summit
Cybersecurity Live, San Francisco

RBLN West
How to Survive the Future, San Francisco

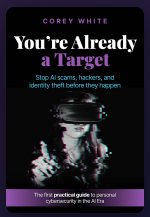

Cal State Fullerton
Career Night guest speaker

CBS News · NYSE Opening Bell · Finovate · NMSDC

Strategic partnerships built at Cyvatar: Mastercard and Booz Allen Hamilton.

THE BOOK

Read before the talk

You're Already a Target

Plain-English cybersecurity for leaders, families and small businesses.
youarealreadyatarget.com

KEYNOTE TOPICS

Six talks, each tailored to the room

01 SIGNATURE TALK

The Quantum Threat Is Already Here

Where quantum physics, AI, and cybersecurity collide

Your passwords, bank transfers and medical records are locked with strong encryption. The keys to those locks are handed over with math a quantum computer is expected to break, and anyone recording that handoff today can open the lock later. This talk connects quantum computing, AI, and cybersecurity in a way that's immediately understandable and actionable.

IDEAL FOR Fintech, enterprise, innovation summits, executive offsites

02

You're Already a Target

AI, cyber threats, and why traditional security is failing

Three seconds of audio. That's all one free tool needed to make a convincing copy of a voice in McAfee's 2023 lab test, and your CEO has done hours of earnings calls. One email. One phone call. One deepfake. And your company is compromised. This is the wake-up call for every leader, manager, and employee.

IDEAL FOR General conferences, industry associations, leadership summits

03

One Breach Is Enough

The business reality of cyber risk and leadership accountability

A breach doesn't just cost money. It costs trust, momentum, and sleep. Most companies that get hit once get hit again, not because the hackers are that good, but because leadership rebuilds on the same broken foundation.

IDEAL FOR Boards, C-suite, PE/VC-backed companies, risk management forums

04 PART TWO OF SANS TALK OF THE YEAR

How to Survive the Future

The AI arms race, the quantum timeline, and a survival framework

Defenders got faster. Attackers got faster still. AI made the old attacks cheaper and more convincing, and quantum computing will break the locks we use to exchange keys. But the same technologies can empower defenders, if we move fast enough.

IDEAL FOR Tech conferences, innovation summits, SXSW, corporate events

05 TEDX-READY

Quantum Leadership

What quantum physics teaches us about decision-making and human potential

A quantum computer doesn't think in ones and zeros. It holds multiple truths at the same time. It connects across impossible distances. It collapses possibility into reality the moment someone observes it. So do you.

IDEAL FOR TEDx, YPO/Vistage, executive retreats, leadership summits

06

Post-Breach Cybersecurity

What happens after ransomware, and where most companies fail

Rebuilding without prevention guarantees a second breach. Corey walks through the post-breach reality and introduces the prevention-first model that changes the equation entirely.

IDEAL FOR CISO roundtables, incident response conferences, managed services events

FOR PARTNERS **Proven Peace of Mind** Keynote or session, 30 to 60 minutes

Cybersecurity for Small Businesses Partner-hosted Close Your Doors workshop, 45 minutes

cythentic.com/partners

FORMATS

Built for your event

- Keynote, 30 to 60 min
- Workshop, half or full day
- Corporate training
- Fireside chat
- Panel, moderator or panelist
- Virtual keynote

Fees vary by format, audience size and travel. Ask for a custom quote.
